

## ZENIT 100 ZENIT 120

Rigid, excellent flexibility, resistance to abrasion, no delamination; perfect tightness to seam and gluing. Insoles from the range Zenit 100 and 120 are ideal for making of stitch-down and glued shoes. The Zenit 120 type is water repellent and therefore perfect for shoes with "Ideal" and "S.Crispino" assembly.

## STAR ZENIT

The complete range of Non-Woven for sewn and cemented shoes

## DIGOSTAR 3000 DIGOSTAR 6000

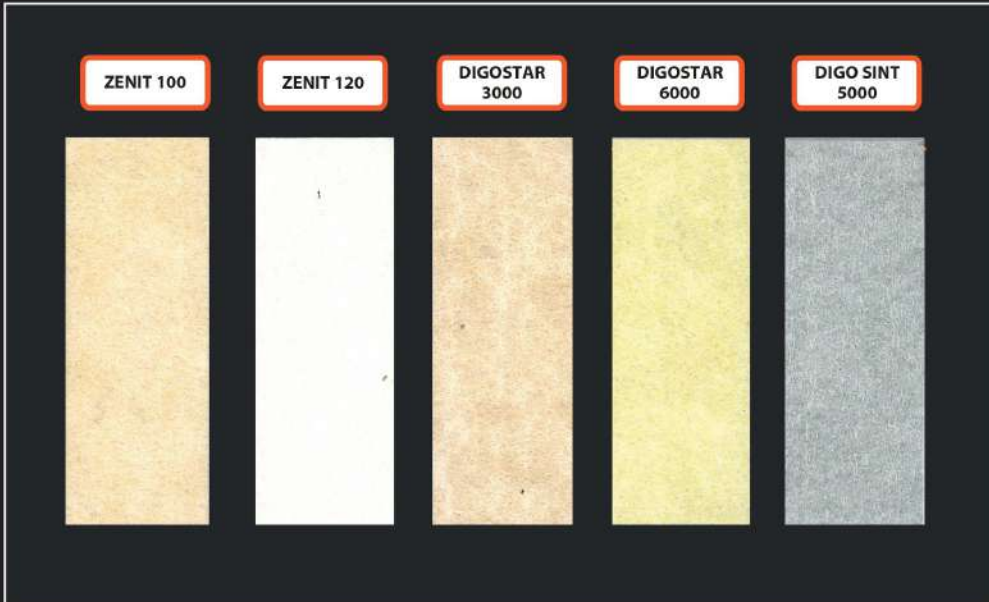

Excellent flexibility, breathability, abrasion resistance, not delaminate; perfect tightness to the seam and to the gluing. The Insoles of the Digostar 6000 & 3000 range are ideal to make sewn and cemented shoes.

## DIGO SINT

Deeped felts boards of high rigidity also suitable for reinforcement heel and shank cover.
