Our STRONG range of products are designed to perfectly meet the various technical requirements for midsole for sports shoes and sneakers. Designed for STROBEL stitching and direct injection of the sole, they are also perfectly suited for flat stitching.

A complete range of thicknesses for all requirements.

Perfect for shoes made by direct injection or casting (both PU, PVC and TR) as well as for glued soles or mounted shoes.

A complete range of products in the collection with a ready delivery service for a wide range of variants.

Available on request in any size, colour or printed surface variants.  
(Contact our sales office for non-standard variants)

Ask for GRS certified materials
